ACADEMIC PROFILE

- **G.H. Raisoni College of Engineering and Management** Nagpur, India
B.Tech in Artificial Intelligence; CGPA: 7.11/10.0 2027 (Expected)
- **Defence Services Academy College** Shahapur, India
Higher Secondary Education (HSC); 2023

SKILLS

- **Languages:** C++, SQL, Node.JS, Python [Pandas — NumPy — Matplotlib — Seaborn, Scikit-Learn]
- **Tools & Technologies:** Git, GitHub, Google Colab, Flask, MYSQL, PostgreSQL, Power BI, MS Office
- **Areas of Interest:** Data Analytics, Business Intelligence, Machine Learning, Deep Learning, NLP

INTERNSHIP / TRAINING

- **Prodigy InfoTech** Remote
Machine Learning Intern Dec 2025
 - **Customer Segmentation:** Engineered a **K-Means clustering model** to group mall customers based on income and spending scores.
 - **Image Classification:** Implemented a **Support Vector Machine (SVM)** to classify images using **HOG features**.

PROJECTS

- **Wholesome Credit Risk Model**
 - Built a credit risk model using machine learning and deep learning techniques to predict the probability of default.
 - Engineered **Logistic Regression, Random Forest & XGBoost** with hyperparameter tuning, achieving **78% accuracy**.
 - Designed a neural network with **Dropout & Batch normalization**, enhancing model prediction accuracy to **81.88%**.
 - Enhanced **1.5% accuracy and ROC-AUC value** by implementing model stacking with Random Forest and XGBoost.
- **Sales Insights Dashboard — Power BI & SQL**
 - Developed an **interactive Power BI dashboard** to analyze **sales trends** across **15+ cities** and **38 stores** in India.
 - Tracked & visualized key **KPIs** including **Sales, Revenue, and Profit Margins** for performance monitoring.
 - The final dashboard is **dynamic & effective** at displaying the **Revenue trend** of hardware business, **FY 2017 to 2020**.
 - **Exposure:** Power BI, SQL, Data Analysis, KPI Tracking, Business Intelligence, Dashboard Design
- **Ecommerce Data Modelling — Python & SQL**
 - Designed **Snowflake Schema Model** for an **Ecommerce platform** to manage **products, customers & orders** data.
 - Generated & inserted **sample datasets** and defined **Primary/Foreign Key** relationships to ensure **data integrity**.
 - Established **SQL connections** between the model and database to **optimized queries** for business analytics.
 - Implemented **Data Processing & Visualization Techniques** to deliver insights supporting **decision-making**.
 - **Exposure:** Python, SQL, Data Modeling, Database Design, Data Visualization, Analytics
- **Cancer Cell Counter — Deep Learning:** Developed a model to count cancer cells in microscope-observed images using **ResNet-34**.
- **Backorder Determination — Machine Learning:** Trained a **Random Forest Classifier** on a highly imbalanced dataset containing **1.6 million records**.

HONOURS AND ACHIEVEMENTS

- **Paper Presentation (RBUCON'25):** Presented a research paper titled "Enhanced IoT-Based Water Quality Monitoring System" at the International Conference on Future Computing Technologies organized by Ramdeobaba University.
