

PROFESSIONAL SUMMARY

: Ambitious and detail-oriented Artificial Intelligence student with strong expertise in Machine Learning, Deep Learning, and Backend Development. Skilled in Python, Flask, SQL, and NLP, with practical experience in data preprocessing, feature engineering, and model performance optimization. Proven ability to improve model accuracy by 15% and reduce training time by 30% during internship projects. Passionate about building AI-driven solutions that enhance decision-making.

EDUCATION

G.H. Raisoni College of Engineering and Management <i>B.Tech in Artificial Intelligence; CGPA: 7.11/10.0</i>	Nagpur, India <i>2027 (Expected)</i>
Defence Services Academy College <i>Higher Secondary Education (HSC); Percentage: 56.67%</i>	Shahapur, India <i>2023</i>

EXPERIENCE

Navodita Infotech <i>Machine Learning Intern</i>	Nagpur, India <i>2023</i>
◦ Model Optimization: Built and optimized Machine Learning models using Python (pandas, NumPy), achieving ~92% accuracy on test datasets. ◦ Data Engineering: Implemented data preprocessing and feature engineering techniques, reducing model training time by 30%. ◦ Algorithm Evaluation: Conducted comparative evaluation of regression and classification algorithms, leading to a 15% improvement in model performance. ◦ Documentation: Documented methodologies and insights for an internship report, collaborating with interns and mentors.	

TECHNICAL SKILLS

Languages: Python, C, C++, Node.JS, SQL
Databases: MYSQL, PostgreSQL
Developer Tools: Git, GitHub, Google Colab
Areas of Interest: Artificial Intelligence, Machine Learning, Backend Development, NLP

PROJECTS

Cancer Cell Counter (Deep Learning): Resnet-34, RMSE Loss Developed a model to count cancer cells in microscope-observed images. Preprocessed images via normalization and centre-cropping. Modified Resnet-34 architecture to have one output neuron. Achieved RMSE Loss of 0.98 and attained runners-up position.
Backorder Determination (Machine Learning): Random Forest, Feature Engineering Objective was to find vital features determining if a product will go on Backorder. Trained Random Forest on a highly imbalanced dataset (1.6M records). Achieved cross-validated recall score of 0.83 without oversampling. Used Feature Importance to extract critical insights.

ACHIEVEMENTS

Paper Presentation (RBUCON'25): Presented a research paper titled "Enhanced IoT-Based Water Quality Monitoring System" at the International Conference on Future Computing Technologies organized by Ramdeobaba University[cite: 1].
Internship Certification (Marpu Foundation): Recognized for contributions as a Content Writing Intern at Marpu Foundation (NGO) during the tenure of July 2025 to August 2025[cite: 2].
